EVIDENCE

Q1 - Discovery and qualification (94/100; weight 30%): "A regional client asked for twenty placements in four weeks. I asked about coverage gaps, attrition, and manager availability. The real constraint was weekend coverage, not headcount. I mapped the five critical shifts and brought delivery into a scoping call. We proposed eight initial placements with weekly checkpoints instead of promising twenty. The first cohort covered all five shifts and the client expanded after six weeks."

EVIDENCE

Q3 - Objection handling (90/100; weight 25%): "A buyer said our fee was eighteen percent above another offer. I clarified the scope and showed our agreed service levels, not unsupported competitor claims. I offered a smaller pilot at the published rate rather than a discount I could not authorize. The buyer selected the pilot. I documented the assumptions and did not guarantee a hiring outcome."

EVIDENCE

Q4 - Client handoff (91/100; weight 20%): "Before handoff I review the signed scope, contacts, success measures, promised timelines, and open risks with delivery. The client joins a kickoff. For one account I highlighted a pending security review and assigned an owner before work began. I stayed through the first checkpoint and confirmed the customer understood the next steps."

LIMITATIONS

- Results are self-reported within an authored demonstration. No employer verification or recorded interview exists.
- Synthetic scores are illustrative, not real assessment results.
- All communication, audio, distraction, confidence and risk signals are synthetic display examples. No real audio/video was analyzed.

Integrity risk context

Simulated risk example only; no integrity assessment of a real person occurred.

Reviewer note

Scores and signals support a human review of available evidence. They do not make a hiring decision.
