SYNTHETIC DEMO · Illustrative scores

RESUME ANALYSIS

**Summary:** [SYNTHETIC DEMO] Administrative assistant seeking a first dedicated support role. Administrative Assistant | Elm Crest Studio (fictional) | 2023-2026 Scheduled appointments, answered general inquiries, and maintained office records. Reception Volunteer | Fictional Community Workshop | 2022-2023 Directed visitors and passed requests to staff. Follow-up: Assess a coached troubleshooting scenario and train on verification, triage, and case-note standards.

INTERVIEW ANALYSIS

**Summary:** [SYNTHETIC DEMO] Limited evidence. Describes general service experience but offers little structured troubleshooting or case-note evidence. The simulated presentation is tentative yet responsive; assess a coached scenario and training needs. Assess a coached troubleshooting scenario and train on verification, triage, and case-note standards.

SIGNALS & CONDITIONS

Evaluation reliability

44%

Strength of the available interview evidence, not certainty about future performance.

AI-aided interview risk

Medium

Simulated demo signal for follow-up examples only, not evidence of AI use by a real person.

A follow-up signal, not proof of AI use or a hiring conclusion.

All signals are authored display examples. No real audio/video was analyzed.

ADVANCED INTERVIEW ANALYSIS

UNANSWERED QUESTIONS

- Assess a coached troubleshooting scenario and train on verification, triage, and case-note standards.

SYNTHETIC EXAMPLE

EVIDENCE SUMMARY

[SYNTHETIC DEMO] Limited evidence. Describes general service experience but offers little structured troubleshooting or case-note evidence. The simulated presentation is tentative yet responsive; assess a coached scenario and training needs. Assess a coached troubleshooting scenario and train on verification, triage, and case-note standards.

| Evaluation conditions | Signal confidence | Audio quality issues | Distraction risk | Integrity risk |
|-----------------------|-------------------|----------------------|------------------|----------------|
| Limited               | Low               | Moderate             | High             | Medium         |

EVIDENCE

Q1 - Customer communication (61/100; weight 30%): "I would apologize and tell the customer I will try to fix it. I once redirected a visitor to the right office. I do not have a detailed example of managing a frustrated support customer through resolution."

EVIDENCE

Q2 - Troubleshooting (47/100; weight 30%): "I might ask them to send a screenshot and tell me what they typed. I have not worked with a formal identity-check process. I now understand that I should not request passwords and would ask a supervisor for the approved troubleshooting steps."

EVIDENCE

Q3 - Prioritization and escalation (50/100; weight 20%): "I would answer whichever ticket I opened first unless someone called again. I cannot give an example of prioritizing a service outage or using an SLA. I would need training on the escalation rules."

EVIDENCE

Q4 - Documentation and privacy (48/100; weight 20%): "I usually write that I talked to the customer and whether I passed it on. I have not used a technical case-note template or redacted a screenshot. I would need clear instructions about what information is safe to store."

LIMITATIONS

- Role-specific examples are missing; scoring only illustrates evidence gaps in this demo.
- Synthetic scores are illustrative, not real assessment results.
- All communication, audio, distraction, confidence and risk signals are synthetic display examples. No real audio/video was analyzed.

Integrity risk context

Simulated risk example only; no integrity assessment of a real person occurred.

Reviewer note

Scores and signals support a human review of available evidence. They do not make a hiring decision.
