

alphaScreen Public Purchase Support Playbook

Internal support guide for self-serve alphaScreen membership purchases.

SUPPORT STANDARD

Every purchase row should be triaged from Admin Public Purchases. Do not manually mark agreements, payments, billing, or account activation outside an approved escalation.

Source of truth

Use Admin Public Purchases to review agreement, checkout, setup, and email state.

Recovery actions

Resend the correct agreement, checkout, setup, or welcome email only when the row allows it.

Escalation boundary

Do not manually change agreement, payment, billing, or account activation state.

What support can resolve

SIX TASKS
ONE SOURCE

Use the admin page to find the buyer's current state, choose the next safe recovery action, and escalate mismatches without exposing private system data.

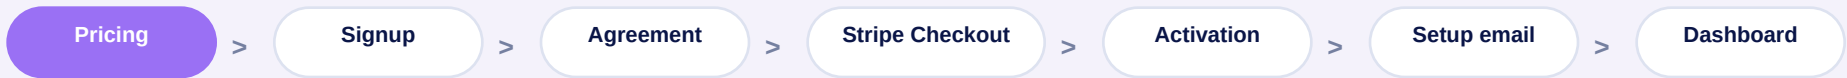

- 1 Find current state**
Review agreement, checkout, setup, and email signals in one row.
- 2 Resume safely**
Use the allowed resend action for the step the buyer is actually in.
- 3 Avoid manual mutation**
Do not mark agreements, payments, billing, or activation by hand.
- 4 Escalate mismatches**
Copy a sanitized support summary when status signals conflict.
- 5 Use safe wording**
Give the next step without sharing private links or provider data.

SUPPORT ACTION

If the row is not clearly complete, describe the current state and next safe step. Do not promise activation, refund, cancellation, or billing changes without confirmation.

Agreement signing gates checkout. Stripe confirmation gates setup and dashboard access.

- Help the buyer resume the next safe step for the current row state.
- Do not skip agreement signing, bypass Stripe Checkout, or override webhook activation.
- Password setup and dashboard access only follow confirmed activation and member linking.

WHERE THE WORK LIVES

Admin Public Purchases quick reference

STATUS TRIAGE
CORRECT ACTION

STATUS	WHAT IT MEANS	CORRECT ACTION	CUSTOMER-FACING LINK?
Agreement pending	Agreement not signed yet.	Resend agreement link if available.	Agreement only
Signed / checkout pending	Agreement signed; payment unpaid or in progress.	Resend checkout link after confirming no paid state.	Checkout only
Setup pending	Payment appears complete; setup or member linking incomplete.	Resend setup email if available; escalate if stuck.	Setup only
Completed	Billing and member access are active and linked.	Guide buyer to login or resend welcome email if needed.	Login/support
Canceled / failed	Payment failed, expired, or purchase canceled.	Confirm state; escalate billing requests.	No payment promise
Unknown / mismatch	Signals do not map cleanly.	Copy support summary and escalate.	No direct link

IMPORTANT DISTINCTION

Email sends do not change payment, billing, agreement, or access status. They only help the buyer resume the allowed next step.

What the page shows

Buyer and company details, membership and cadence, source path, agreement status, checkout signals, setup state, and email delivery state.

Row actions

Open Details before acting. Resend agreement, checkout, setup, or welcome email only when the row allows that action. Copy support summary for escalation.

What it cannot do

It cannot mark an agreement signed, mark checkout paid, activate billing, edit Stripe subscriptions, delete records, or override member state.

STANDING RULE

If the row is not clearly complete, describe the current state and next step. Do not promise activation, refund, cancellation, or billing changes without confirmation.

Refresh

>

Escalate if mismatched

AVOID THIS

Do not use spreadsheets, inbox notes, or memory as the daily source of truth for purchase status.

Scenario group: agreement and checkout

Agreement pending

Symptoms

- Agreement sent or opened
- Checkout is not paid
- Buyer cannot find signing email

Support action

Confirm buyer email and row state, then use Resend agreement link if available.
Ask the buyer to use the newest agreement email.

DO NOT

Do not send checkout instructions before agreement signing.

Suggested wording

I resent the agreement email to the buyer address on file. Please use the newest email to review and sign before checkout.

Signed / checkout pending

Symptoms

- Agreement signed time is present
- Payment is unpaid, pending, or failed
- Buyer has not completed payment

Support action

Confirm the signed agreement and unpaid state, then use Resend checkout link if available. Refresh after checkout completes.

DO NOT

Do not tell the buyer the membership is active until payment and setup are complete.

Suggested wording

Your agreement appears signed. I resent the secure checkout recovery email so payment can continue from the current signup.

Scenario group: Stripe return and setup

Did not return from Stripe

Symptoms

- Buyer says payment completed
- Browser closed or return failed
- Admin row may still be pending

Support action

Refresh the admin row. If completed, guide login or setup. If signals conflict, copy support summary and escalate before asking for another payment step.

DO NOT

Do not ask the buyer to pay again until review confirms it is safe.

Suggested wording

We are checking the purchase status before asking you to take another checkout step.

Paid but setup pending

Symptoms

- Payment appears complete
- Client/member setup is incomplete
- Buyer cannot access dashboard

Support action

Confirm payment and member setup state. Use Resend setup email when available. Escalate if setup remains stuck after refresh.

DO NOT

Do not share setup tokens or manually mark setup complete.

Suggested wording

Payment appears complete, and the remaining step is account setup. I resent the password setup email.

Scenario group: existing user and email recovery

Existing user purchase

Buyer already has an alphaScreen login. Confirm linked member state, then direct them to sign in with the existing account.

Welcome email not received

If setup exists and the row allows it, resend welcome email. Welcome email should not block working dashboard access.

Setup email not received

Confirm payment and setup state, then resend setup email if available. Ask the buyer to use the newest setup email.

DO NOT

Do not create a duplicate user.

DO NOT

Do not paste provider payloads into notes.

DO NOT

Do not share password setup tokens.

CUSTOMER WORDING

SITUATION	USE THIS WORDING
Existing login	Please sign in with your existing account first. If the new membership is not visible, we will review the account link.
Welcome email	I resent the alphaScreen welcome email. You can still sign in if password setup is complete.
Setup email	I resent the password setup email. Please use the newest email to finish account access.

Scenario group: identity and duplicates

Wrong buyer email

Symptoms

- Agreement or checkout went to wrong address
- Buyer asks for link forwarding
- Purchase may be signed or paid

Support action

If unsigned and unpaid, recommend restarting signup with the correct buyer email unless an approved admin path exists. Escalate signed or paid records.

DO NOT

Do not forward agreement, checkout, or setup links to a different email.

Suggested wording

The buyer email controls agreement, checkout, and setup delivery. We need to review the safest correction path.

Duplicate purchase attempt

Symptoms

- Multiple rows for same buyer or company
- One row may be more advanced
- A paid duplicate is possible

Support action

Compare status, created time, membership, cadence, and payment indicators. Continue from the most advanced legitimate row and escalate any possible duplicate billing.

DO NOT

Do not delete duplicate records or ask for repeat payment while any row may be paid.

Suggested wording

I see more than one signup attempt, so I am checking the active path before sending another payment or setup instruction.

Billing requests and payment mismatch

ESCALATION REQUIRED
NO MANUAL STRIPE MUTATION

Cancellation, refund, or membership change

Locate the row, copy the support summary, acknowledge the request without promising the outcome, and route it to the approved billing/admin owner.

Webhook or payment mismatch

If buyer-reported payment, Stripe indicators, and setup state do not agree, refresh, copy the support summary, and escalate before asking for another payment step.

AVOID THIS

Do not promise a refund, cancellation, membership change, or billing cadence change. Do not edit Stripe subscriptions directly from this workflow.

CUSTOMER WORDING

I received your request and will route it for billing review. We will confirm the next step after the purchase and payment status have been reviewed.

Email delivery issues and escalation rules

ONE SAFE RESEND
SANITIZED ESCALATION

Email delivery issue

Confirm the needed email, use the correct resend action once if available, ask the buyer to check spam and quarantine, then wait for delivery state to update.

Escalate immediately

Payment/state mismatch, signed agreement blocked from checkout, setup stuck after payment, wrong buyer email after signing or payment, possible duplicate billing, or repeated delivery failure.

INCLUDE

- Sanitized support summary
- Current status label and buyer-reported problem
- Recovery action already attempted and approximate time

DO NOT INCLUDE

- Secrets, tokens, auth headers, or webhook signing details
- Full signing, setup, or password reset URLs
- Raw provider payloads or unnecessary private data

SAFE WORDING

I resent the correct alphaScreen email for your current setup step. If it still does not arrive, we will escalate the delivery check.

Safe support language snippets

SITUATION	USE THIS WORDING
Agreement link	I resent the alphaScreen membership agreement to the buyer address on file. Please use the newest email to review and sign before checkout.
Checkout link	Your agreement appears to be signed. I resent the secure checkout recovery email so payment can continue from the current signup.
Password setup	Payment appears complete, and the remaining step is password setup. I resent the setup email to the buyer address on file.
Existing account login	This purchase appears tied to an existing alphaScreen login. Please sign in with your existing account first.
Payment under review	I do not want to ask you to repeat checkout until the current payment state is verified. We are reviewing the purchase status.
Billing request	I received your request and will route it for billing review. We will confirm the next step after the purchase and payment status have been reviewed.
Escalation	This needs internal review before we can safely change the purchase path. I am escalating the current status and will follow up.

Glossary and production use note

Purchase intent

Internal record created when a buyer starts public membership signup.

Membership agreement

Agreement the buyer reviews and signs before secure checkout.

Stripe Checkout

Secure payment step used after agreement signing.

Setup email

Email that helps the buyer set a password or complete account access.

Welcome email

Email welcoming a new alphaScreen client after activation when applicable.

Support summary

Sanitized row summary intended for internal escalation.

PRODUCTION USE NOTE

After launch, use the production Admin Public Purchases page for live customers. Do not use QA links, QA records, or QA screenshots when supporting a live buyer.

FINAL STANDARD

Each buyer should receive the next safe step for their current purchase state. Admin recovery actions help the buyer resume agreement, checkout, or setup. They do not replace agreement signing, payment confirmation, or account activation.
